Primary lithium battery
LS 17500

3.6 V Primary lithium-thionyl chloride (Li-SOCl₂)
High energy density
A-size bobbin cell

Benefits

• High voltage response, stable during most of the lifetime of the application
• Wide operating temperature range (-60°C/85°C)
• Low self-discharge rate (less than 1% after 1 year of storage at +20°C)
• Easy integration into compact systems
• Superior resistance to atmospheric corrosion

Key features

• Stainless steel container and end caps (low magnetic signature)
• Hermetic glass-to-metal sealing
• Non-flammable electrolyte
• Underwriters Laboratories (UL) Component Recognition
• Compliant with IEC 60086-4 safety standard and IEC 60079-11 intrinsic safety standard (class T3 assignment)
• Non-restricted for transport/Non-assigned to Class 9 according to the UN Recommendations on the transport of dangerous goods – Model Regulations
• Manufactured in France

Main applications

• Utility metering
• Automatic meter reading
• Alarms and security devices
• Tollgate systems
• Identification tags
• Tracking systems
• Automotive electronics
• Professional electronics

Electrical characteristics

(typical values relative to cells stored for one year or less at +30°C max.)

Available termination suffix

- CN, CNR
- 2 PF, 3 PF, 3 PF RP, 4 PF
- CNA (AX)
- FL
- radial tabs
- radial pins
- flying leads...etc.
**Storage**

- The storage area should be clean, cool (preferably not exceeding +30°C), dry and ventilated.

**Warning**

- Fire, explosion and burn hazard.
- Do not recharge, short circuit, crush, disassemble, heat above 100°C (212°F), incinerate, or expose contents to water.
- Do not solder directly to the cell (use tabbed cell versions instead).
